

Audience Response System

(the keypads)

Summary of QOL NACES Research Project - Burhonstipogov- NACR 303-838-9359, Survivors' Network 1-800-537-8295

1

Audience Response System (ARS) - the keypads

-  The keypads work best if placed on your desk so that you can press your choice/answer firmly
-  You do not need to "point" the keypad (like a TV remote control)
-  You will see a counter in the bottom left-hand corner of the slide to see how many people have "voted" on any item

4

Audience Response System (ARS) - the keypads

-  You can change your vote up until the final vote has been collected and the slide advances to show the total
-  A summary of bar graphs appears on the screen for most of the items after the votes are completed
-  The summary bar graph will not appear for intake items, other than demographics
