## Getting Started with Metrics and Reports for Patient Navigation Programs

Linda Burhansstipanov, MSPH, DrPH (Cherokee Nation of Oklahoma) Linda U. Krebs, PhD, RN, AOCN, FAACE, FAAN (English) Lisa Harjo, MEd (Choctaw Nation of Oklahoma) Native American Cancer Initiatives, Inc. (NACI) 3022 South Nova Road Pine, CO 80470-7830 Phone: 303-838-9359 (messages); 303-550-5181 (cell) <u>https://www.NatAmCancer.org</u> Burhansstipanov@gmail.com

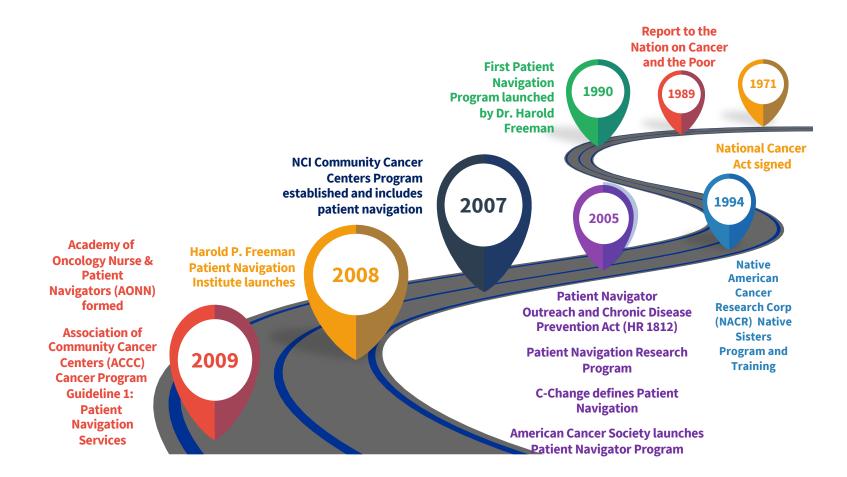

#### **Objectives; By the end of this session, participants will be able to:**

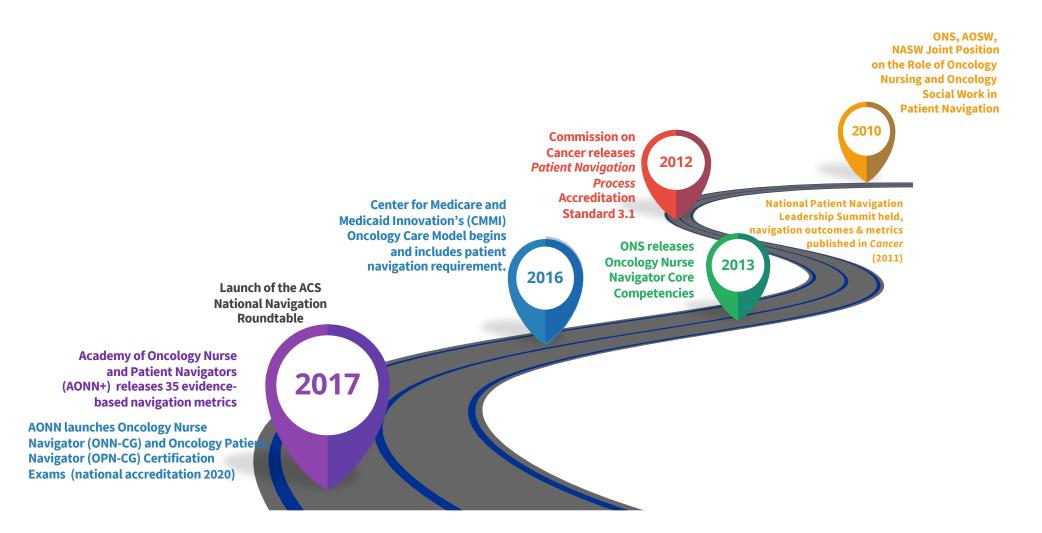

- Explain the evolution of nationally recommended metrics
- Identify what a navigation program needs to have in place to begin collecting, reporting and using nationally recommended metrics
- Examine 3 group-selected metrics from the ~35 nationally recommended metrics

Disclosure: we will be using NACI Care <sup>™</sup> to illustrate how to enter data and generate reports for this IPNN session. NACI Care <sup>™</sup> is a licensed product for sale (Indigenous programs get significant discount).

# Explain the evolution of nationally recommended metrics

Linda Burhansstipanov

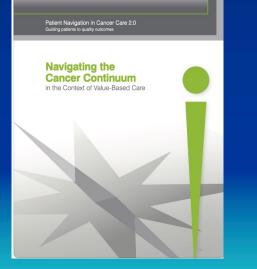

#### **Patient Navigation and refinement of metrics**

- Academy of Oncology Nurse and Patient Navigators (AONN+) released Standard metrics (35) in 2017
- Patient Navigation in Cancer Care 2.0: Guiding patients to quality outcomes: Navigating the Cancer Continuum in the Context of Value-Based Care. Pfizer Oncology, PP-IBR-USA-2070-05, November 2018

Standardized Metrics Source Document The following paper is the working source

document from the Standardized Metrics Task Force of the Academy of Oncology Nurse Navigators. For the published articles related to this topic, please visit www.jons-online.com.

Native American Cancer Initiatives, Inc. (NACI); https://www.NatAmCancer.org/

https://www.patientnavigation.com/

# Examples of National Organizations & recommendations for metrics and reports

- Commission on Cancer
- The National Accreditation Program for Breast Centers
- The American Society of Clinical Oncology (ASCO), Quality Oncology Practice Initiative Merit-based Incentive Payment System / Alternative Payment Models
- Center for Medicare and Medicaid, Oncology Care Model
- Academy Of Oncology Nurse & Patient Navigators
- Oncology Nursing Society

NOTE: uniformity in PN data metrics

#### 3 areas of measurement:

- Patient Experience (PE)
- Clinical outcomes (CO)
- Return on investment (ROI)

Native American Cancer Initiatives, Inc. (NACI); https://www.NatAmCancer.org/

#### **Navigation Metrics Toolkit (August 2020)**

- Collaboration between the American Cancer Society, the Academy of Oncology Nurse and Patient Navigators (AONN+) and the Merck Foundation
- Designed to facilitate patient navigation programs integrate the 35 metrics identified and documented by AONN+ in 2017.
- These metrics were important for all programs ("basic") ... so there are many more metrics that individual programs need
  - Ot all programs will include all metrics

https://aonnonline.org/images/resources/navigation\_tools/2020-AONN-Navigation-Metrics-Toolkit.pdf

#### NAVIGATION METRICS TOOLKIT August 2020

Native American Cancer Initiatives

Native American Cancer Initiatives, Inc. (NACI); https://www.NatAmCancer.org/

#### 2020 Clarified how 10 of the 35 metrics could be measured and evaluated

- Concurrently, process for obtaining national accreditation for PN exam
- American National Standards
   Institute (ANSI) National
   Accreditation Board (ANAB)
- National Certification for Oncology Nurse and Patient Navigator Generalists Available in US (August 5, 2020)

https://aonnonline.org/press/3068-anab-awards-national-accreditation-toaonn-foundations-for-learning-inc

#### **Detailed Study Metrics with Measurement Information**

1 BARRIERS TO CAI	RE	
Measure description	Number and list of specific barriers to care identified by navigator per month (obstacles that prevent a cancer patient from accessing care, services, resources and/or support)	
Initial population	Number of cancer patients, regardless of age, who were receiving navigation services during the 6-month measurement period	
Denominator	Total number of barriers identified per patient during the measurement period	
Numerator	Number of barriers identified per patient per month	
Exclusion and exception	None	
Data sources	<ul> <li>EHR</li> <li>NAVmetrics<sup>™</sup></li> <li>Institutional navigation software</li> </ul>	
Key terms, data elements, codes	<ul> <li>Financial [insurance, transportation, communication, language, knowledge deficits, work/disability, need help at psychological (fear, anxiety, distress)]</li> <li>Practical [children, etc.]</li> <li>Physical [pain, anorexia, mobility]</li> <li>Complex care coordination</li> <li>Other [home, cultural, spiritual]</li> </ul>	
Unit of measurement or analysis	Number of barriers	
Sampling	Care settings will be compared.	
Risk adjustment	None per patient (outer data will be analyzed and omitted if necessary)	
Data period	October 15, 2018, through April 15, 2019	
Measure results	Monthly metric data will be compared between each study site and an aggregate benchmark for all participating sites; the benchmark will use rolling 12-month data and display 25th, 50th, and 75th percentiles.	
Calculation/Measure algorithm	Data will be reported in percentiles.	

1. Treatment Compliance: Percentage of navigated patients that adhere to institutional treatment pathways per percent       quarter Number Percent       20. Patient Retention through Navigation: analytic cases per month or quarter that re institution due to navigation. [Part 1 of met outingration (i.e., insurance, logistics, analytic cases per month or quarter that re institution due to navigated patients per month         3. Interventions: Number and specific referals / interventions offered to navigated patients per month       month       Number       21. Emergency Department Utilization: Nu navigated patients per month         4. Clinical Trial Education: Number of patients educated on clinical trial department       month       Number       22. Emergency admissions per Number of navigated patients visits to the emergency or month referred to clinical trial department         5. Clinical Trial Education: Number of patients education encounters by navigator per month       month       Number       23. Cancer Screening Follow-Up to Diagno Number of navigated patients who are referred to revenue generating services (i.e., radiology, rehabilitation, palliative care, tumor site-specific pre/rehab programs)       Number       43. Cancer Screening Follow-Up to Diagno Number of participas creening visit per month         7. Buildive care, tumor site-specific pre/rehab programs)       8. Blue font: metrics clarified in 2020 Metrics Document

Green highlight: metrics NACI Care<sup>™</sup> refined fall 2023

Identify what a navigation program needs to have in place to begin collecting, reporting and using nationally recommended metrics

Linda Krebs

#### **Needs for metric collection**

- Overall navigation program readiness
  - An administration/organization that understands what the navigation program is supposed to do / understands its goals and mission
  - Administrative / organization support to begin collecting and reporting metrics
  - Which metrics are most likely to make an impact?
  - What is the question the navigation program needs answered first?
  - SWOT (strength and weaknesses) analysis

#### **Needs for metric collection**

- PN staff readiness
  - Willing to learn about and collect metrics
  - Have a knowledge-base of current recommended metrics
  - Understand navigation program well enough to determine what data are feasible to collect
- Some method to collect the data (desirable to have at least Excel or REDcap)
   Does not need to be linked to EHR or EMR
- Templates to make data entry and reporting simpler
  - May create a metric and report template library; user can pick and choose which metrics the program needs

#### **Needs for metric collection**

- IT session / cheat sheet to assure talking about the same issues (same data fields/common language)
- Knowledge of what do you do with the data once you've got it
  - How validate the data that are being collected
  - How do you assure data contribute to patient well-being
  - How to create benchmarks; is there a central location for benchmarks; which are appropriate for your site / multiple sites?
- Meet with team to review and discuss metrics regularly (frequency defined by your program)
- Solution NACI Care<sup>™</sup> or similar data entry program

#### **Desirable for metric collection**

- PNs have had competency-based training
- PN has Computer skills
- Have available IT staff
  - Have a good Relationship with IT
- Readiness to present data at Cancer Committee Meetings and Tumor Boards, and through conferences, publications, etc.

#### **Challenges in Collecting Data for Metrics**

- Multiple systems within same program that don't link
- Ability to collect metrics vary by how the programs/clinics are set up; what challenges (e.g., COVID), staffing issues, staff spread out rather than what navigator may normally be required to so
- Having to double document
- ROI: don't know how to gather data
  - A tool for documentation

#### **Challenges in Reporting Metrics and Data**

- When generate reports, they are not what they need to be
- Put data in system (e.g., report sheet, EHR, etc.) and not able to get reports
- Uncertain of data validity
  - Discrete versus duplicative reportable fields
  - People document in different fields
  - Items are not indexed the same
- **ROI:** Converting barriers to dollars

#### **Challenges in Using Metrics**

- ROI: PNs get patients with the highest barriers. The non-navigated patients may not need PNs and the data look worse for the PNs with high demand patients.
- Managing versus solving / resolving or overcoming barriers
- Admin: how to elevate metric discussion to higher-ups
   How tie data to dollar amounts for PN programs
- What does the PN or navigation program do when the data identify a problem with patient care, or within the PN program, or HC organization

### Examine 3 group-selected metrics from the ~35 nationally recommended metrics

Lisa Harjo

#### Brief Overview of NACI Care™

- Focuses on cancer care, addressing the entire cancer continuum (outreach to end of life)
- Manages patient care (in and out of clinical settings)
- Expedites gathering, collecting and analyzing patient navigation visit data
- Designed to work with all racial and underserved patient programs (minorities, genders, ages) (i.e., it is not limited to Indigenous populations)
- Facilitates compliance with standardized metrics and accreditation requirements
- Generates tailored pages and reports for:

#### Brief Overview of NACI Care<sup>™</sup>

Generates tailored pages and reports for:

- Individual or groups of patients
- Individual or groups of patient navigators (PNs)
- Navigation program evaluation, research, and benchmarking
- Designed for iPad tablets
- Capable of linking to EPIC electronic health records

#### Using NACI Care<sup>™</sup> Reports as examples

- Metric 2. Barriers to Care
- Metric 3. Referrals to Interventions
- Metric 4. Clinical Trial Referrals
- Metric 8. Diagnosis to initial treatment
- Metric 10. Patient Experience / Satisfaction with Care
- Metric 16. Navigation Caseload
- Metric 23. Cancer Screening Follow-Up Diagnostic Workup
- Metric 24. Cancer Screening
- Metric 29. Psychosocial Distress Screening
- Metric 30: Social Support Referrals

### **QUESTION:** Which metrics are of highest priority to your program?

Treatment Compliance Barriers to Care Interventions: Referrals Clinical Trials Education		23. Cancer Screening Follow-Up to
